Offic	e Action Summary			

Application/Control Number: 08/013,543

Art Unit: 2642

#### **CLAIMS**

### **Art Rejection**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 31-33, 36-37, 39-41, 43, 49-50, 55-56 are rejected under 35 U.S.C. 102(e) as being anticipated by Konishi et al. (US 4720707).

Regarding claim 31, Konishi shows:

Obtaining means for obtaining an image by scanning a sheet (2);

Character-recognition means (col. 5, lines 51-55);

Determining means for determining a type of character data (col. 5, lines 51-55);

Application/Control Number: 08/013,543

Art Unit: 2642

Display controller that controls a display of the image together with the character data arranged in a plurality of frames corresponding to each of the types determined by the determining means (col. 12, lines 50-53); and

memory for storing the image together with the character data (41-47).

Regarding claim 55, Konishi shows the steps of:

Obtaining an image by scanning a sheet (2);

Obtaingin character data from the image by performing character recognition (col. 5, lines 51-55);

Determining types of character data (col. 5, lines 51-55);

Controlling a display of the image together with the character data arranged in a plurality of frames corresponding to each of the types determined by the determining means (col. 12, lines 50-53); and

Storing the image together with the character data (41-47).

Regarding claim 56, Konishi shows the steps of:

Obtaining an image by scanning a sheet (2);

Obtaingin character data from the image by performing character recognition (col. 5, lines 51-55);

Determining types of character data (col. 5, lines 51-55);

Application/Control Number: 08/013,543

Art Unit: 2642

Controlling a display of the image together with the character data arranged in a plurality of frames corresponding to each of the types determined by the determining means (col. 12, lines 50-53); and

Storing the image together with the character data (41-47).

Regarding claims 32-33, 36-37, 39-41, 43, 49-50, Konishi shows:

the image data and the plurality of frames are displayed side-by-side (col. 12, lines 50-53);

The determining means (col. 5, lines 51-55);

memory stores the image data and the character data (41-47);

A manual entry device and means for correcting and adding means (col. 12, lines 50-53);

Copying means (3);

Searching unit (col. 4, lines 57-62, 67-68, col. 5, lines 1-2);

A selector (col. 4, lines 67-68, col. 5, lines 1-2);

A communication controller (col. 4, lines 7-13, 25-30);

The image reader (2);

Instruction for the reader, registration and display (figs. 1-2, col. 4, lines 7-39).

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 5

Art Unit: 2642

4. Claims 34, 42, 44-48 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zamora in view of Konishi et al in view of Murata et al. (US 4670791).

Regarding claims 34, 42, 44-48, Konishi shows the stored documents and enabling exchange of documents with another system through a communication channel (col. 4, lines 7-13).

Konishi differs from the claimed invention in that it does not show the communication is performed based on the phone numbers on the documents.

However, Murata teaches to set up a communication based on the phone numbers read from the documents (col. 6, lines 16-30).

Hence, it would have been obvious for one skilled in the art to adapt Murata's communication method in Konishi, such that to prevent the transmission of a document to a wrong destination by reading the phone numbers directly from the documents (col. 6, lines 16-30, col. 1, lines 50-52 in Murata).

#### **ARGUMENT**

5. In response to the remarks (pages 5-8) filed on 09-09-02, Zamora is withdrawn, therefore, no further discussion is made regarding Zamora and its combination.

Konishi and Murata are cited to address the current claimed features, see rejections above.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728. The examiner can normally be reached on Mon-Fri. from 8:30 to 6:00.

Application/Control Number: 08/013,543 Page 6

Art Unit: 2642

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Admad Matar, can be reached on (703) 305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.

Primary Examiner Art Unit 2642

## Recent Statutory Changes to 35 U.S.C. § 102(e)

On November 2, 2002, President Bush signed the 21st Century Department of Justice Appropriations Authorization Act (H.R. 2215) (Pub. L. 107-273, 116 Stat. 1758 (2002)), which further amended 35 U.S.C. § 102(e), as revised by the American Inventors Protection Act of 1999 (AIPA) (Pub. L. 106-113, 113 Stat. 1501 (1999)). The revised provisions in 35 U.S.C. § 102(e) are completely retroactive and effective immediately for all applications being examined or patents being reexamined. Until all of the Office's automated systems are updated to reflect the revised statute, citation to the revised statute in Office actions is provided by this attachment. This attachment also substitutes for any citation of the text of 35 U.S.C. § 102(e), if made, in the attached Office action.

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 in view of the AIPA and H.R. 2215 that forms the basis for the rejections under this section made in the attached Office action:

### A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

35 U.S.C. § 102(e), as revised by the AIPA and H.R. 2215, applies to all qualifying references, except when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. For such patents, the prior art date is determined under 35 U.S.C. § 102(e) as it existed prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. § 102(e)).

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 prior to the amendment by the AIPA that forms the basis for the rejections under this section made in the attached Office action:

## A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

For more information on revised 35 U.S.C. § 102(e) visit the USPTO website at www.uspto.gov or call the Office of Patent Legal Administration at (703) 305-1622.
